DETAILED ACTION

1. Examiner regrets the untimely reopening of prosecution.
2. Applicant's amendment and accompanying remarks filed February 10, 2005 have been acknowledged.
3. The objection of claim 10 is withdrawn due to applicant's argument.
4. The rejection of claim 2 under 35 U.S.C. 112, second paragraph is withdrawn due to applicant's argument.
5. Newly submitted claim 10 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claim 10 is directed towards a method for preparing an organic electroluminescent material. Original claims 1-9 are directed towards an organic electroluminescent material and an organic electroluminescent elemental device.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 10 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Art Unit: 1774

7. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 6-8 are rendered indefinite because compound (A) possessing one less nitrogen atom forming triarylamine would not be commensurate in scope with the triarylamine containing 2 to 4 nitrogen atoms when the triarylamine starts with 2 nitrogen atoms.

Additionally, the claims are rendered indefinite because compound (B) possessing one more nitrogen atom forming diarylamino groups would not be commensurate in scope with the triarylamine containing 2 to 4 nitrogen groups when the triarylamine starts with 4 nitrogen groups.

Response to Arguments

8. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.
